Software Engineer – Android Mobile Applications

YOUR RESPONSIBILITIES INCLUDE:

- Design and develop applications aligning to the company technology framework and using state of the art solutions
- Perform bug fixing and maintenance of the applications
- Ensure systems reliability, security, manageability, scalability, extensibility, performance and re-use.
- Participate in complete software development life cycle from design specification, testing and post implementation system support.
- Provide technical expertise on the areas of architecture and design
- Assist the team or liaise with other teams from conception to implementation and support
- Adhere to Zero Defects standard

YOU WILL BE A PERFECT FIT IF YOU HAVE:

- A Bachelor's Degree in Software Engineering from a recognized university
- Overall 3 to 4 years of experience in Android mobile application development
- Excellent knowledge in Android, Java technologies, REST web services, RDMBS and Non-RDBMS
- Experience in React Native app development, UI / UX design and project management would be an added advantage.
- Must have good business analytical skills with excellent verbal/written communication skills.
