

Associate Software Engineer - Backend - Work From Home

We are an IT company that focuses on building health platforms. This is a work-from-home position

JOB DESCRIPTION

We are looking out for some energetic individuals with a flair for coding for our IT team. The incumbent will work as part of a young and dynamic software development team and should be someone who will be able to create some exceptional software solutions.

Job Requirements:

- A bachelor's degree in computer science, IT, or equivalent.
- 6 months of work experience in a similar industry
- Strong communication and interpersonal skills
- Hands-on experience with PHP and Javascript.
- CSS and HTML skills are a bonus
- Demonstrates strong coding ability, debugging, and analytical skills

Responsibilities:

- **Be willing to work on Wordpress, Appscript, and Appsheet (Google Technology)**
- Design and build applications using up-to-date technologies
- Collaborate with cross-functional teams to design and deliver new features.
- Provide comprehensive support for all applications.
- Involvement in core-business activities, including coordination for staff and record keeping.

How we'll help you grow:

- We will provide training based on Project Requirements
- You will learn directly from expert developers in the field; our team leads love to mentor.
- You will get an opportunity to work on the complete lifecycle of projects
- You will get an opportunity to work on multiple technologies.
- You will work from Home

If you feel you fit into the above requirements and would like to take up the given role, please apply soon at **hr@esperance.group**

Please note that this is a home-based full-time job from 7:00am to 3:00pm Monday to Friday.
